

Possible steps to be included in Sol Roadmap

- Formation of drafting team (composition?)
- Agreement on annotated outline (produced by drafting team with technical support from UN-REDD)
- Compiling information and preparation of first complete draft (synergies with SIS process – does drafting team need support to access information?)
- Review process (draft to be reviewed by whom, in which order, through what mechanisms? Internal technical review by UN-REDD team as a first step?)
- Finalization and approval by STWG
- Formal approval (responsible entity for UNFCCC reporting, any other bodies?)
