

Monitoring Framework for REDD

Rome 10 September 2009

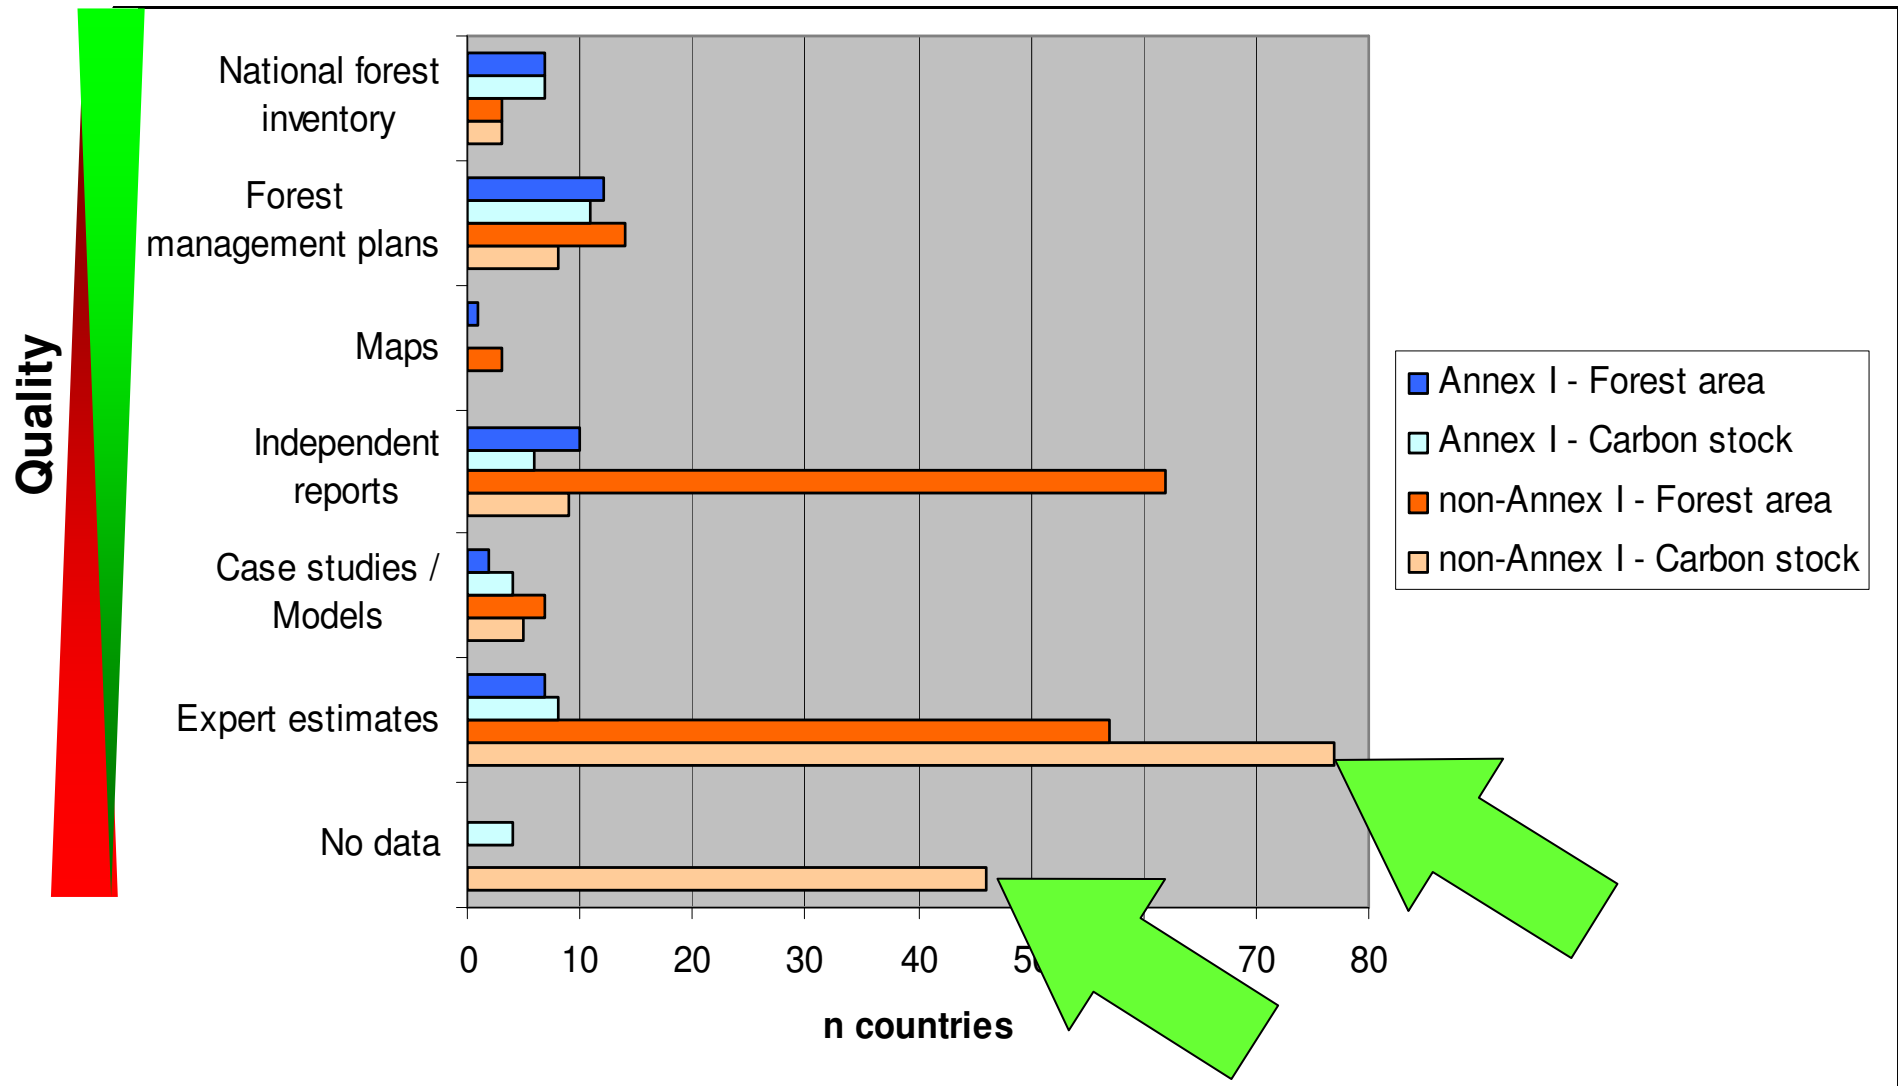

Peter Holmgren, FAO

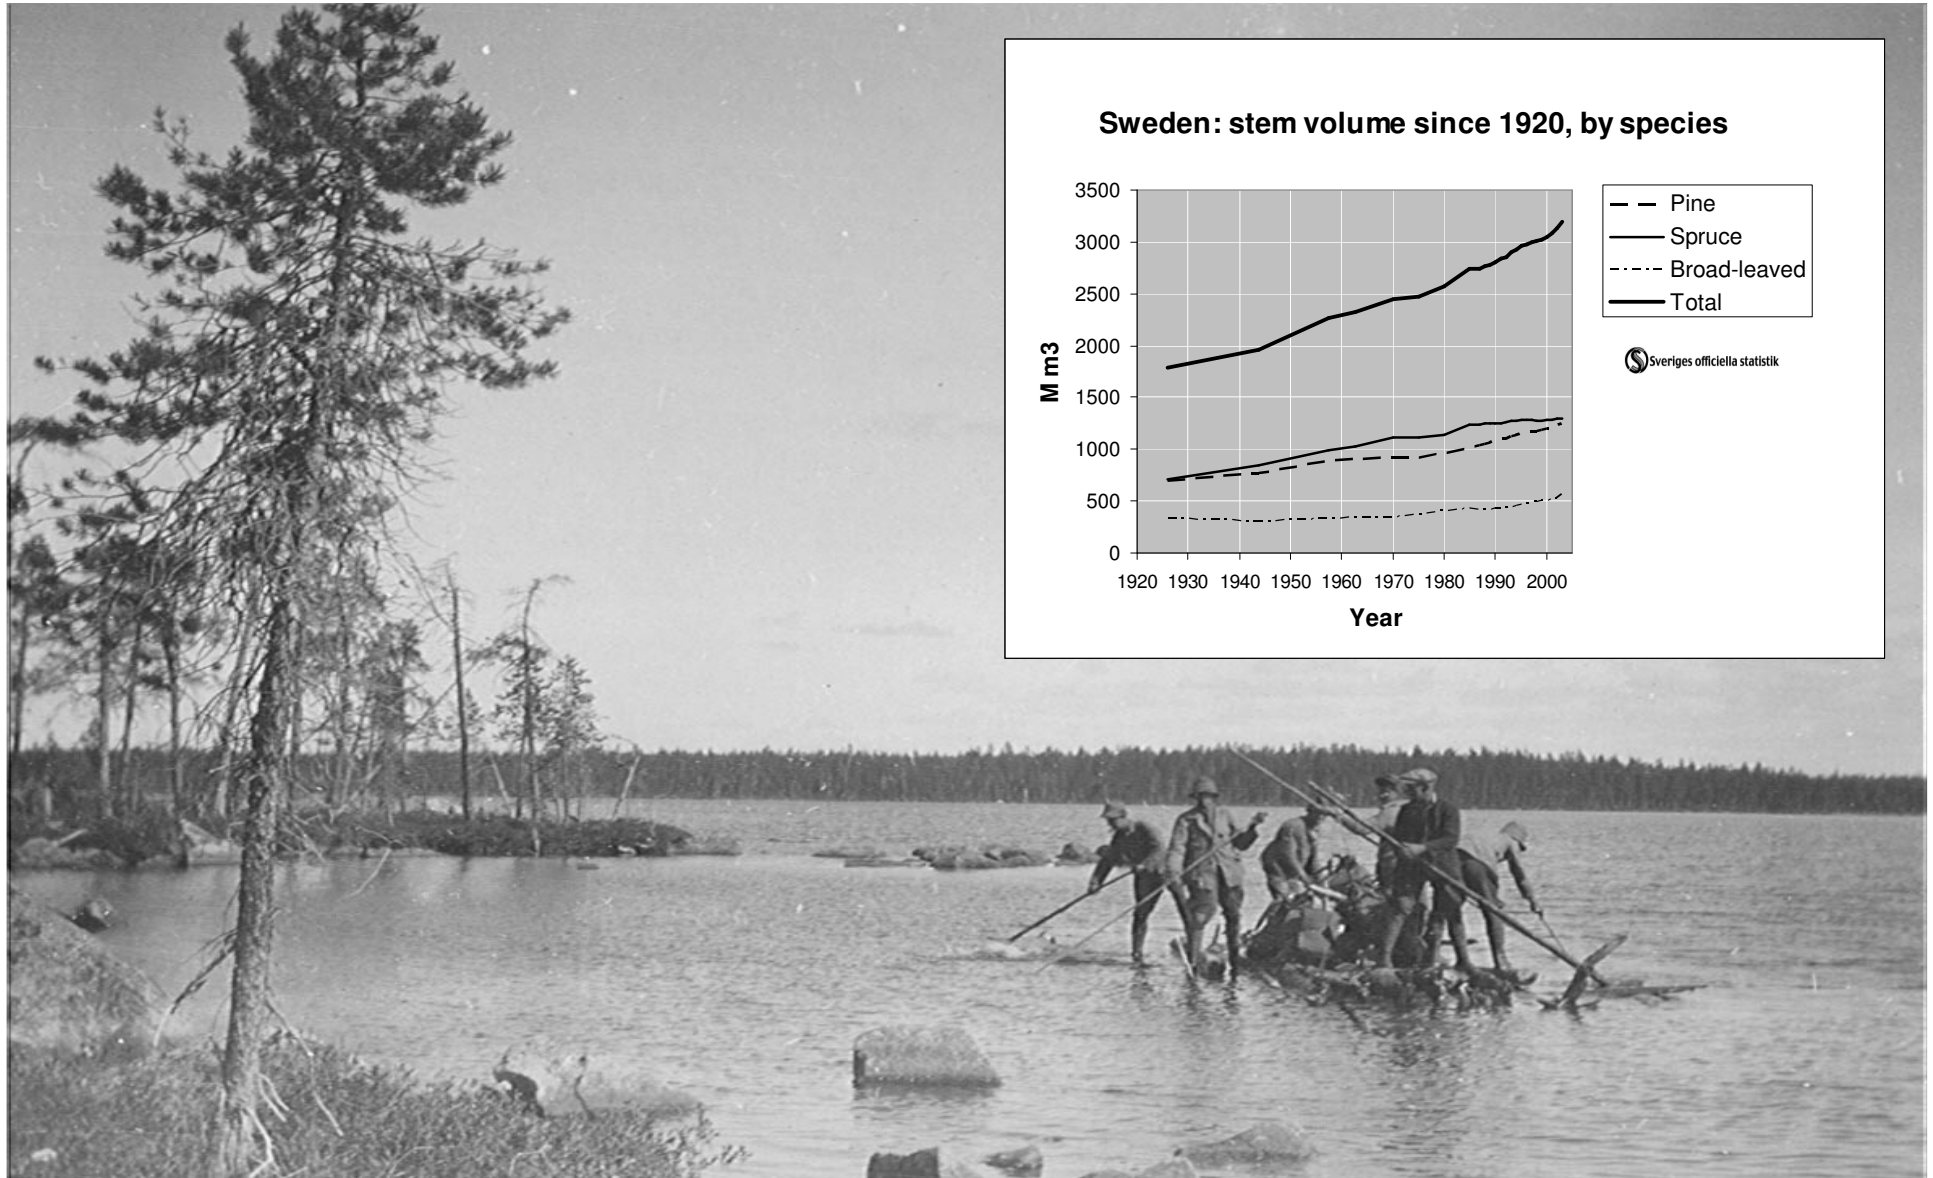

What is the Question?

- How do we ensure successful implementation of REDD?

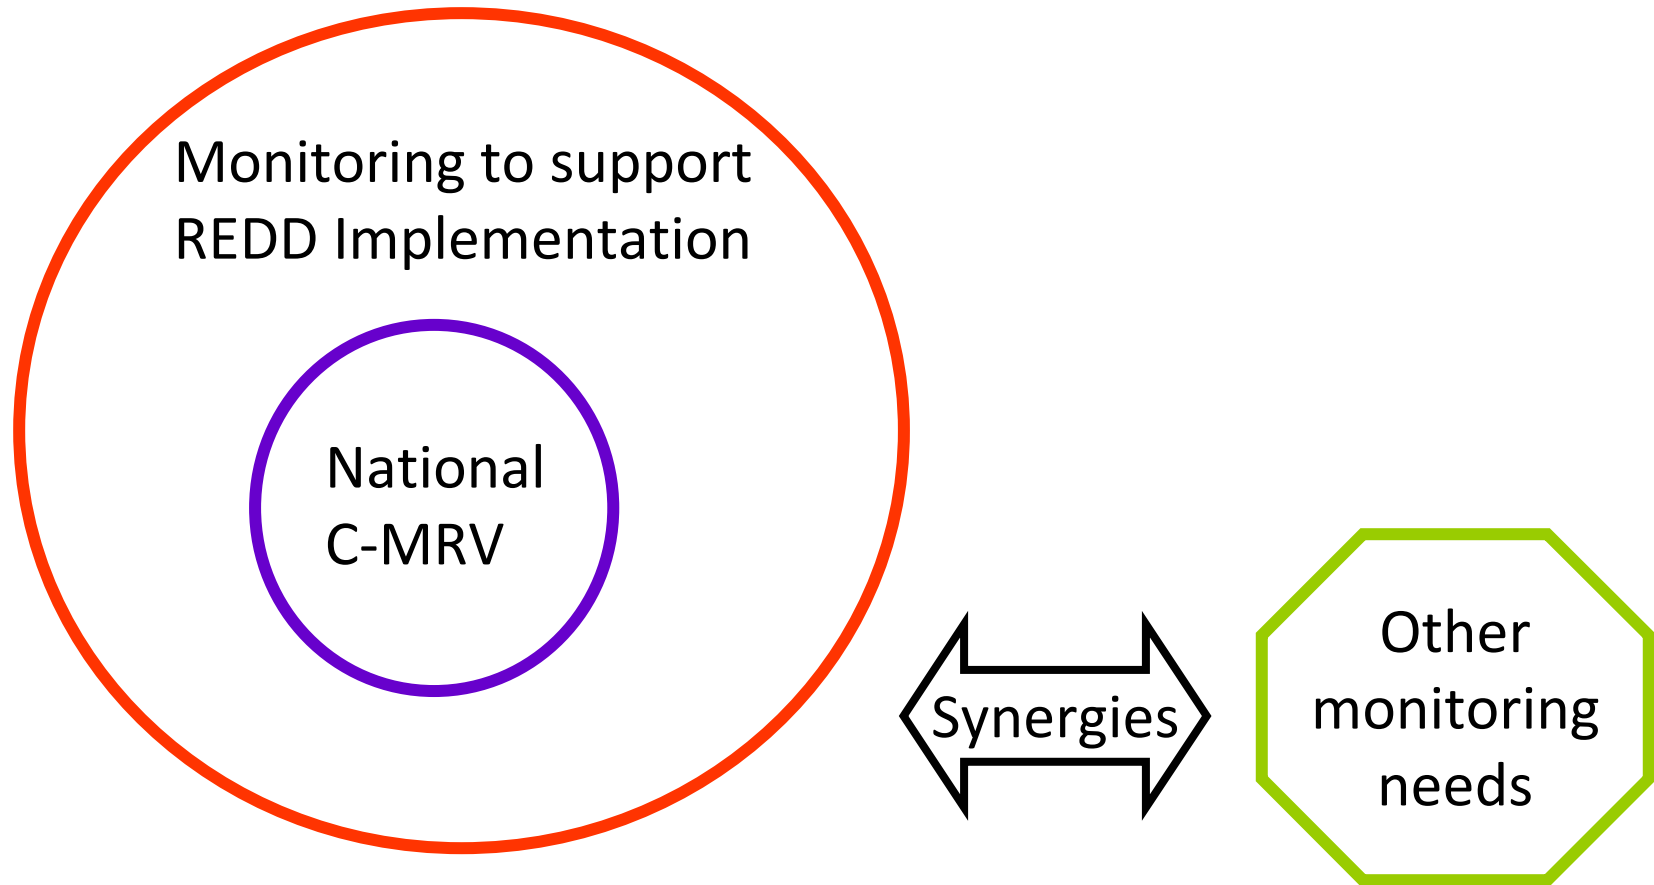

Current data sources (above-ground C)

Long-term institutional effort

Monitoring vs. National C-MRV

REDD Monitoring - Key Considerations

- 1 Monitor What Matters
- 2 Warrant Multi-stakeholder process
- 3 Ensure Quality, Reporting and Verification compliance
- 4 Guarantee Availability and Accessibility of data and Methods
- 5 Support Investment and Sharing of Benefits
- 6 Strengthen Institutional, Technical, Legal and Policy Development Capacities

Conclusions

- Need for framework to address monitoring and C-MRV
- Reduce confusion on methodological options
- Considerable investments needed in the field
- Monitoring Framework is key for international exchange/support
