Experience of the PGA Pilot Project in Indonesia: Developing set of Indicators

PGA FOR REDD+ IMPLEMENTATION IN INDONESIA

Implemented by UNDP INDONESIA
Partnering with Ministry of Forestry, UKP4 and Ministry of Development Planning
Supported by UN-REDD GLOBAL Programme
Working Closely with Civil Society Organizations, Indigenous Organizations, Sub-national Government , and academicians

Jossi Katarina, LLM-PGA Expert Panel Members

REDD+ PGA Framework

Forest Management Issues	Components		
	Law and Policy Framework	Actors' Capacity (Government, Civil Society, IPs and local Community, Business Entity)	Implementation-Performance
Spatial Planning	Indicators	Indicators	Indicators
Rights Regulating	Indicators	Indicators	Indicators
Forest Organizing	Indicators	Indicators	Indicators
Forest Management	Indicators	Indicators	Indicators
Forest Control	Indicators	Indicators	Indicators
REDD+ Infrastructure	Indicators	Indicators	Indicators

1. The indicators in the above table reflect good forest governance principles: transparency, participation, accountability, coordination, equity, capacity .
2. Law and policy framework here is the content of law and policy framework to be measured through the assessment. In order to measure the content of law and policy framework, data items will be collected to determine whether a certain law or policy covers one or more good forest governance principles.
3. Capacities of stakeholders are capacities for implementing one or more good forest governance principles to tackle forest management issues.
4. Whereas implementation and performance is the process as well as results of tackling forest management issues through the application of good governance principles
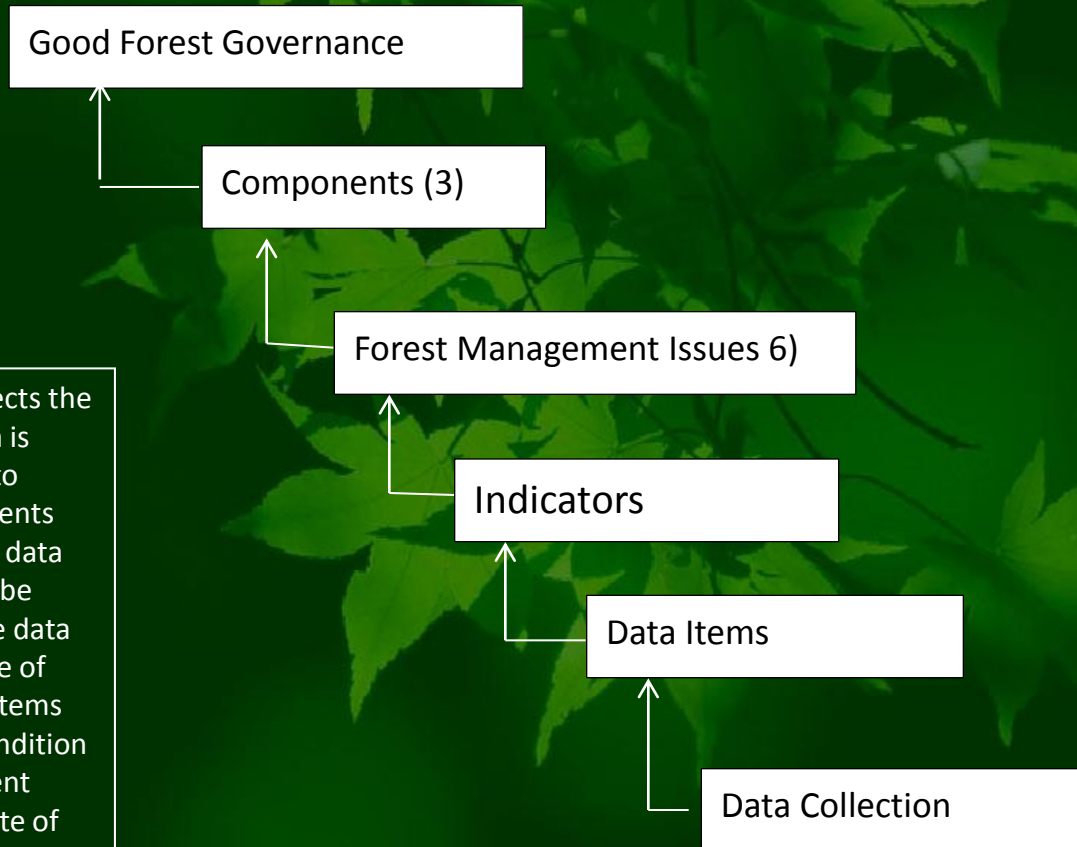

Measurement Structure

Forest Governance

Components

Law & Policy

Actors' Capacity

Implementation/ Performance

Issues

Law & Policy	Actors' Capacity	Implementation/ Performance
Spatial & Forestry Planning	Spatial & Forestry Planning	Spatial & Forestry Planning
Regulating the Rights	Regulating the Rights	Regulating the Rights
Forest Organizing	Forest Organizing	Forest Organizing
Forest Management	Forest Management	Forest Management
Forest Control	Forest Control	Forest Control
REDD+ Infrastructure	REDD+ Infrastructure	REDD+ Infrastructure

Indicators

Data Items

Data Collection

Note: This flow reflects the process of how data is collected and used to explain the components condition. Based on data collection, they will be used to examine the data items. The aggregate of the examined data items will measure the condition of forest management issues. The aggregate of forest management issues will measure the PGA components and the aggregate of components will measure forest/REDD+ governance.

Thank You Very Much/Terima Kasih Banyak
