

UN-REDD Programme
3rd Policy Board Meeting
29 September 2009

UN-REDD PROGRAMME

The United Nations Collaborative Programme
on Reducing Emissions from Deforestation and
Forest Degradation in Developing Countries

The UN-REDD Programme is a
collaboration between FAO, UNDP and UNEP that supports countries in
the development of capacity to reduce emissions from deforestation and
forest degradation (REDD) and in the implementation of a future REDD
mechanism in a post-2012 climate regime.

www.un-redd.org

Over one billion people, including Indigenous Peoples, rely directly or indirectly on forests for their livelihoods. National REDD strategies should be simple, flexible and developed in a participative and transparent manner taking into due account of the interests of Indigenous Peoples and local communities.

The UN-REDD Programme is a partnership between FAO, UNDP and UNEP supporting country efforts to reduce emissions from deforestation and forest degradation - commonly known as "REDD+".
