Global Symposium

REDD+ in a GREEN ECONOMY

Reaching Out and Scaling Up the Private Sector

UN-REDD Program
Jakarta, 19-21 June 2013

Facilitating, Sharing, Inspiring

Human Rights

Labor

Environment

Anti-Corruption

Y.W.Junardy

President,
Indonesia Global Compact Network
President Commissioner
PT Rajawali Corpora

Green economy is an economy that results in improved **human well-being & social equity**, while significantly reducing **environmental risk and ecological scarcities**.

In its simplest expression, a green economy can be thought of as one which is low carbon, resource efficient and socially inclusive (UNEP)c

Economic Prosperity
Environmental Sustainability
Social Equity

Global Compact Network

Talking about REDD+ in Green Economy basically we have to address
the above “Themes”

(24–25 March 2013)

Private Sector Leaders Roundtable Bali (24-25 March 2013)

Governance
and Rule of
Law

Education

Social
Integrated
and Inclusion

Sustainable
Consumption
and
Production

Poverty
Eradication

Roundtable Discussion on how company could best contribute to each issue, how business could have the greatest impact, which potential partner can support the efforts

Other priority:

Health, Climate Change, Energy,
Biodiversity and Environment, Infrastructure

- The private sector **can play pivotal role** in REDD+ readiness and implementation
- Business can provide **technical expertise and training** of variety of skill set relevant to their functions by implementing inclusive business strategy and support SME's – **Job Creation**
- **Social inclusion** is critical to create positive impact within community which in turn allowing more sustainable growth – **Social justice**
- **Innovative business solutions** are needed to address the issues such as sustainable production, energy access, water security, carbon emission etc. - **Environments**
- **Multi-stakeholder partnership** is very important in order to scale up their impacts on all issues. Need clarify roles and expectation. – **Collaborative Action**
- **Clear accountability** to evaluate progress through wider corporate transparent disclosure. - **Measurements**

The Means of Implementation

Global Compact Network
Indonesia

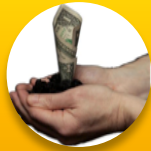

AN ASSOCIATION OF COMPANIES

**Scaling-up
corporate
sustainability**

**Expansion and
deepening
engagement**

Financing

**Industry
Sector
Initiatives**

**Transformational
Partnerships**

**Corporate
accountability
and reporting**

The Enabling Environment

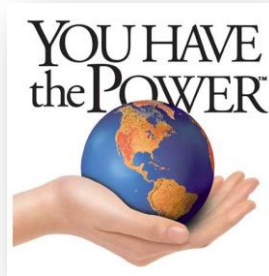

- **Mainstream the sustainable development principles** into national and sub-national policy-making processes
- **Elaborate the inter-linkages of development issues** - to ensure comprehensive policy mix of different sectoral policies (*e.g. poverty and human rights, poverty and environment sustainability, poverty and health services etc*)
- It should be **synchronized** with the medium and long-term development plans to provide actionable policies and programs with **specific targets and indicators.**
- Conduct **education and socialization supported** by consistent national campaign
- **Facilitate, consultation and dialogue** for multi-stakeholder commitment and participation (*Business, CSO, Academic*)

Good Governance, competence resources and political will

Global Compact Network
Indonesia

- Good governance is a **critical enabling factor**.
- Good governance principles should be promoted as **fundamental values** that guide our efforts to execute *i.e. transparency, accountability, responsiveness, serving attitude, ethical, participatory, equitable and inclusiveness*
- Develop **competence** to achieve excellence in public services by deploying **skilled resources** and **sustainable technology**
- Establish **national-wide data bank** to ensure data consistency and integrity (*policy making, research, development*)
- Strong **political will** to eradicate corruption, law enforcement, access to justice, effective public policies, just spatial management, conducive business climate, friendly environment and social inclusion.

To be engaged in addressing global issues
to participate in **collaborative actions**
to help improving **social and environment** in order
to ensure **long term sustainability**
