2.1 Output/activity delivery status

	Outputs	Status	Comments
1.	Final report on multiple benefits of REDD+ in Panama	Completed.	The results of the analysis of multiple benefits have proven key in attracting the interest of REDD+ stakeholders in non-carbon benefits
2.	Final report on costs of REDD+ in Panama	Inputs to the opportunity cost report are being received. We will produce a final version before the administrative closure of the programme (31 December 2015).	The analysis of costs of REDD has been highly influential in the discussion of REDD+ options in Panama.

4.	Proposal for an information system on how safeguards are being applied in REDD+ in Panama	The government has requested that this component be implemented as part of the FCPF process. UN-REDD supported preparatory activities, workplan and undertook the selection and hiring process of the consultancy company.	None
5.	Proposal for a registry system	This component has been merged with #3 above in view of the need to treat both operational and legal aspects simultaneously.	None
