

# The UN-REDD Programme

Asia/Pacific Knowledge Management Action Plan, 2015

## Regional Knowledge Exchange on National Strategies/Action Plans

Bangkok, 29-31 July 2015

### Day 1, Session 2: Planning the NS/AP Design Process: Indonesia

By Heru Prasetyo

# Background to Planning the NS/AP Design Process in Indonesia

- REDD+ is a convergence of three powerful issues: Global Climate Change, National Development and Governance Reform with Landscape as its Theatre;
- ‘Failed’ when started partially by Bappenas or Ministry of Forestry;
- Need to understand the National Landscape of things
- Collaborative efforts needed from the beginning – create a task force;
- Use consultant to help in the kitchen, not to drive;
- Do macro-phased approach – One: Creating The Movement and Two: The Business End.

# The Process of NS/AP Design

- Parallel Holistic: Three Cores and Seven Peripherals;
- Team of experts, regional consultation, national consultation, international experts consultation;
- Drafts to sectoral ministries, website for 30 days;
- Campaign progress at sub national, national and international fora;
- Sub National Strategy/Action Plan is an integrated part of NS/AP; and
- Need political decision on formalities.

# Results/Achievements of the NS/AP Design Process

- Stakeholder engagement from the sub national level begun;
- Network of local and international experts ready to support;
- Safeguard concept based on “Not a disturbed neighbor” applies;
- REDD+ as a movement, not just projects, take roots;
- Allow a corridor for Implementation Planning;
- At least 10 forested provinces ready to implement (5R10I).

# Challenges Encountered with the NS/AP Design Process

- Sub National Stakeholder consultation turning into one way ‘socialization’;
- National needs overruled by global frameworks;
- Sectoral interest consolidation, collaboration and coordination control;
- Capacity building to allow next step of the process is needed;
- International campaign is necessary to get NS/AP support – relying on National support alone is risky;
- Avoiding the trap of Projectisation due to mandate limitations.

# Questions/Advice to UN-REDD or other countries

- Need to develop Scenario Based Planning for Actions – any guideline developed by UN-REDD on how to do it?
- Phase One Strategy is to develop movement. Transition to ‘Phase Two Strategy – Business’ needs to be planned. Experiences?
- Business Strategy needs to have: Market Offering definition (asset class?), Market Identification, Accounting Processes, Transaction Protocol, Product and Proceed pooling, Interdependent Benefit Mapping, Benefit Distribution Strategy, etc. Ideas?
- What have UN-REDD developed to stay ahead of the curve?

# Thank You
