

MINISTRY FOR FOREIGN AFFAIRS OF FINLAND UN-REDD

he United Nations Collaborative Programme In Reducing Emissions from Deforestation and mest Degradation in Developing Countries

Evaluación Nacional Forestal - ENF

Open Foris Collect in Ecuador

- Support for the inventory
- OFC beyond National Inventory
- Current status

Tena - Ecuador Abril, 2013

Benefits:

files)

- No experts needed for excel programming
 - All variables have the same priority
- Uncomplicated data entry process
- Easy unexpected-error corrections
- Fast access to important data (xls)

With out a system

Support for the inventory

- Information security compromised
- High dependence in current staff
- Almost non adaptability (start over the same effort many times)
- High possibilities of having a bunch of undetected errors

•Forms designed on VISIO

Acceso a la PARCELA

6. Puntos de referencia (PR) identificados en la caminata de acceso a la parcela: (Ingresar al menos 3 puntos de referencia PR)

Descripción del PR	UTM X	υτ Μ Υ	Código foto	Azimut (°)	Distancia m
	Descripción del PR	Descripción del PR UTM X	Descripción del PR UTM X UTM Y Image: Im

With PDF forms

(XML)

Support for the inventory

•PDF form

Benefits:

- XML programming is not difficult to understand
- Easy to apply basic validations
- Platform independence (Adobe features works with Open Office tools)
- Basic knowledge needed for calcs and data modeling

- 1,00 0,90 0,80 0,70 0,60 0,50 0,40 0,30 0,20 0,10 0,00 With PDF forms (XML)
- Disadvantages:
 - Barely scalibility
 - No robustness at all
 - Unsustainable structure growth
 - Risky and not-supported interoperability methods
 - Unexpected errors difficult to modify (almost unhandleable) at greater scale

- Benefits: – Scalability
 - Interoperability
 - Basic configuration needed to start a full-use
 - -Less assistance from TU while field
 - teams get used to it
 - 100% adaptable
 - Workflow for many specific task

- Oportunities:
 - Now how
 - Local knowledge
 acquired
 - Participate with the community to share better and further improvements
 - ...so on

Beyond ENF

Beyond ENF

- Other entities using OFC:
 - Public:
 - UNL: National University of Loja (Forestry Engineering Career)
 - Practice forest inventories
 - UTEQ: State Technical University of Quevedo
 - Forest inventories
 - ESPOCH: Polytchnic School of Chimborazo
 - Land use surveys
 - Forest inventories (moorland cover)
 - Private:
 - Condesan (ONG): forest inventories for MAE

Current status

- Biophysical survey to OFC 3.0
 - Migration: 600 cluster
- Socioeconomic survey creation
 - Migration: 170 surveys on SPSS
- Alometric equations survey creation

 South-South cooperation framework: Paraguay getting a OFC user/developer team start (pilot ph.)

¡Muchas Gracias!
