

# Engagement

Over one billion people, including Indigenous Peoples, rely directly or indirectly on forests for their livelihoods. National REDD+ strategies should be simple, flexible and developed in a participative and transparent manner taking into due account of the interests of Indigenous Peoples and local communities.

UN-REDD  
PROGRAMME

The UN-REDD Programme is a partnership between FAO, UNDP and UNEP. It supports developing country efforts to reduce emissions from deforestation and forest degradation - commonly known as “REDD”.
