

Demonstrations Technical Team

Developing Policies and Measures

Team Highlights

Goal: To ensure that lessons and experiences from pilot initiatives are captured and analyzed and the information is used to support the development of policies and measures for the Cambodia REDD+ programme.

Objectives:

- Promoting stakeholder engagement;
- Developing participatory monitoring protocols;
- Developing locally appropriate forest management interventions (policies and measures).

The Demonstrations Technical Team undertakes work on **Policies and Measures on REDD+**.

Beneficiaries: The programme builds capacities of government agencies and non-governmental stakeholders.

Lessons Learned/Achievements:

- It is essential to understand the drivers of deforestation and forest degradation clearly in order to design effective policies and measures
- Drivers vary by forest type and by location, so it cannot be assumed that interventions which work well in one area will work as well in other areas
- Bottom-up planning is required to ensure stakeholder engagement in designing policies and measures

Challenges: Clarifying policies and measures applicable at the local, sub-national and national scales in order to reduce emissions effectively and sustainably.

The Demonstrations Technical Team is made up of representatives from FA and FiA (MAFF), GDANCP (MoE), MME, MoI, MEF, and CG. It was established in early 2014, and has held five meetings to date, to assist in the identification of policies and measures for REDD+ in Cambodia.
