

**SMALL-SCALE FUNDING AGREEMENT
BETWEEN
THE UNITED NATIONS ENVIRONMENT PROGRAMME (UNEP)
AND
GRID-ARENDA
RELATING TO MANGROVE REPORT ON REDD+ IN CENTRAL AFRICA**

**NARRATIVE REPORT
18 DECEMBER 2014**

Activity 1 – Compilation and edits of the report “Carbon Pools and Multiple Benefits of Mangroves: Assessment for REDD+ in Central Africa” to include the REDD+ components following agency review, namely; UNEP, UNDP, FAO and as recommended by the Publishing Board.

Edits were compiled and updated in the English version of the report. Gabriel Grimsditch, representing the authors, was contacted to suggest responses to edits when necessary.

Activity 2 – Translation of report into French and Spanish Report.

Once edits on the English version were completed in Activity 1, the full report was translated into French and Spanish.

Activity 3 – Layout of English, French and Spanish versions of the report

All three language versions of the report had the layout completed and high resolution, low resolution and print-ready .pdf files were created. The French and Spanish versions also had “Executive Summary and Key Recommendations” summary reports completed and .pdf files of these summary reports were produced as well.
