## Introduction

Go-REDD+, first launched its welcome message on January 6, 2012, is an e-mail listserv managed by the UN-REDD Programme team in Asia-Pacific, based in Bangkok. The team has begun this initiative to serve national counterparts and practitioners with limited time availability to keep abreast of the rapidly evolving REDD+ landscape by providing brief snapshots of timely issues and debates. As an electronic mailing list, Go-REDD+ disseminates relevant information and serves as a node for discussing “hot” topics. On average, two of one-page brief messages are mailed to the recipients each month or every other week to wide range of audience including Policy makers, International development partners, Researchers etc.

## Objective

- Distributing synopses of research results and the most updated activities related to REDD+ in Asia-Pacific to assist countries in their REDD+ readiness efforts through email listserv.

## Operation and management

### *Listserv*

The mailing list was gathered between November and December 2011 from participant lists of several workshops and other events, which UN-REDD organized or participated in, business cards, and existing list of emails of UN-REDD partners. Altogether, there were 437 email recipients (as of January 6, 2012).

Additionally, those who are interested in receiving or unsubscribing to Go-REDD+ message can email to [goredd.th@undp.org](mailto:goredd.th@undp.org). The new subscribers include practitioners working the area of environment and climate change – government and private sector, scholars, researchers and academia across region. The team even received some feedbacks from other initiatives i.e. [News Update of CIFOR](#), which requested to have a joint listserv to reach wider audience, as well as a scholar from Africa, who was interested in learning updated REDD+ activities through Go-REDD+. As a result, Go-REDD+ currently has 517 recipients and no unsubscribe request has been received (as of July 19, 2012).

### *Management*

The first Go-REDD+ message “Guidelines for free, prior and informed consents for REDD+” was distributed on January 9, 2012. The old messages can be archived on the [Regional Activities pages](#) of the UN-REDD Programme website. Additionally, [discussion forum](#) on Go-REDD+ is available through the Workspace for members of UN-REDD Programme’s online knowledge sharing platform to share their thoughts. As of July 19, 2012, 10 Go-REDD+ articles, listed below, were circulated to recipients.

Issue No.	Title	Sending date	No. of downloads
1	Guidelines for free, prior and informed consents for REDD+	9-Jan-12	339
2	REDD+ Payments and the limitations of opportunity cost approaches	23-Jan-12	461
3	Pro-poor benefit distribution in REDD+	7-Feb-12	532
4	Will REDD+ lead to weaker or stronger access rights in Cambodia?	29-Feb-12	229
5	Is REDD+ in its present form achievable by all?	14-Mar-12	400

6	Lessons from REDD+ from how to become forest-adding country	28-Mar-12	15*
7	Where should anti-corruption efforts in the forest sector?	17-May-12	21*
8	Conveying REDD+ at the local level: Some steps in the right direction	5-Jun-12	21*
9	Logging and REDD+: Are they compatible	18-Jun-12	22*
10	Deciphering UNFCCC Decisions on National Forest Monitoring Systems for REDD+	3-Jul-12	169

\*The low number of downloads of Go-REDD+ issue # 6<sup>th</sup>, 7<sup>th</sup>, 8<sup>th</sup> and 9<sup>th</sup> were potentially due to technical issue related.

### Go-REDD+ on other websites

Go-REDD+ articles were shared and posted on some websites as listed below.

## Go-REDD+ survey

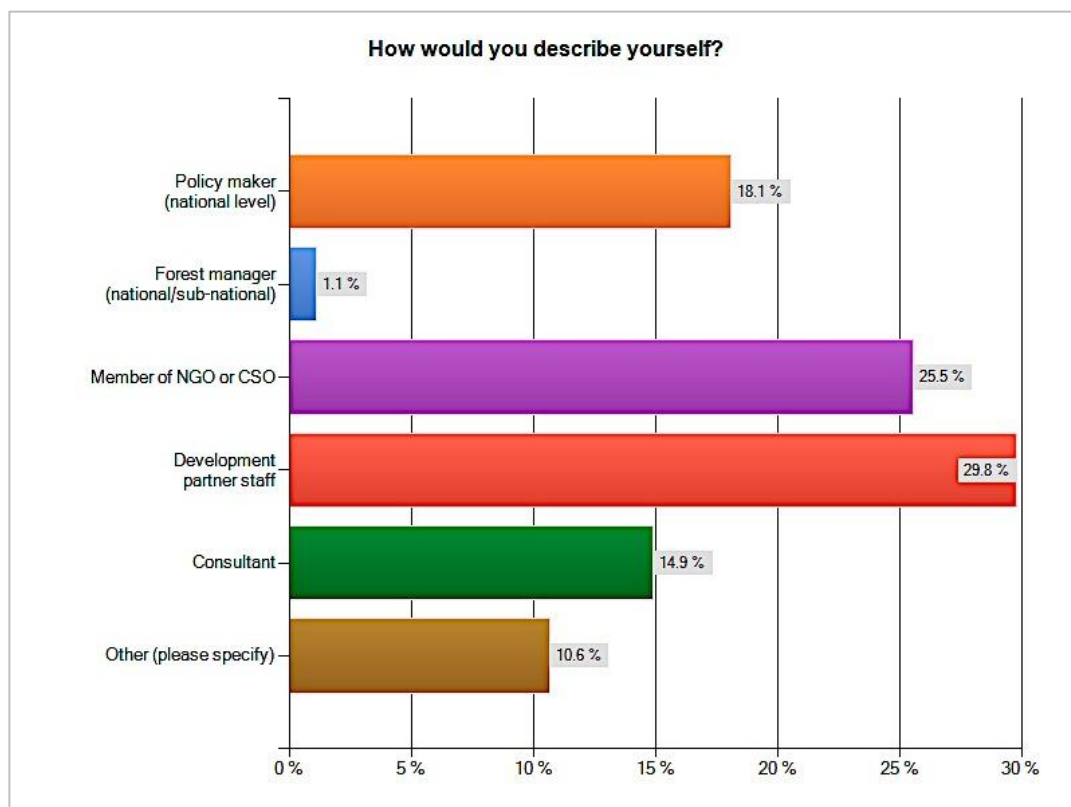

The survey was conducted after Go-REDD+ messages have been in circulation for nearly 6 months. The UN-REDD team in Asia-Pacific has begun this initiative to serve national counterparts and practitioners with limited time availability to keep abreast of the rapidly evolving REDD+ landscape by providing brief snapshots of timely issues and debates, and, therefore, it is important to learn if the work has been useful to and interest the readers. The survey questionnaire (Annex I) was sent through an online survey tool “Survey Monkey” on July 9, 2012 and was closed on July 17, 2012. 517 of survey invitations were sent out and 94 responds were received.

### Objective of the survey

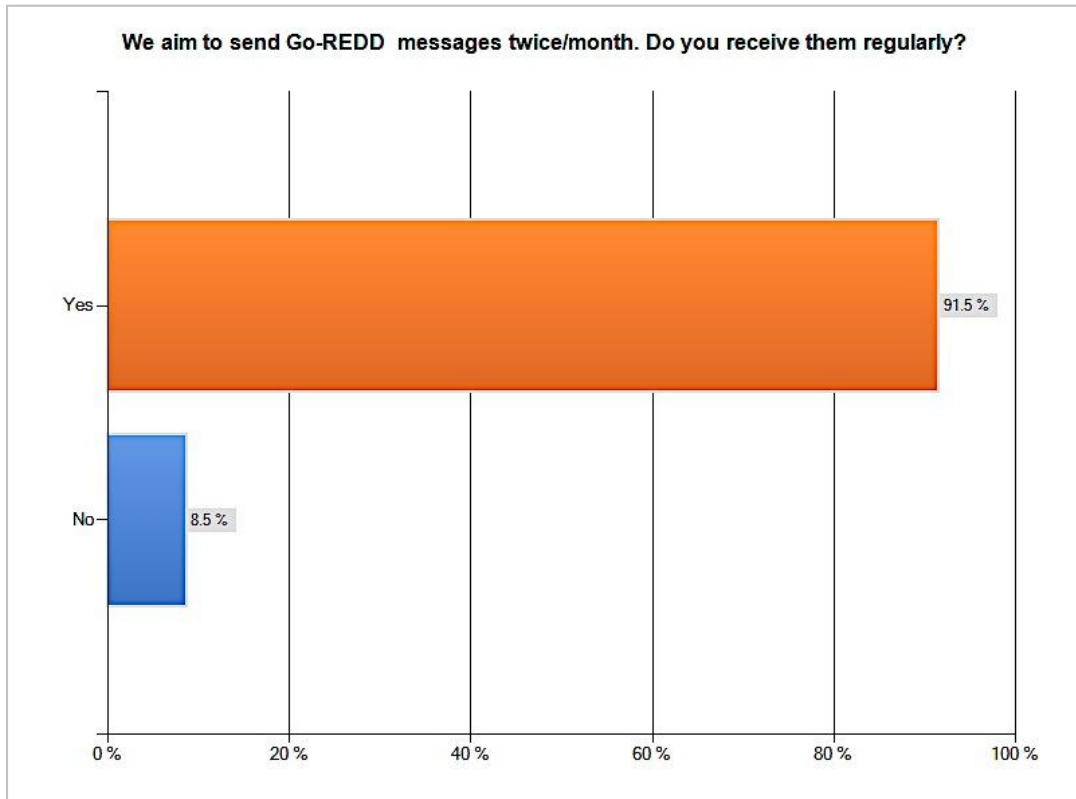

- For the team to better understand the Go-REDD+ readers’ needs and interests, and learn if the delivered information is most timely, interesting and useful to the recipients, and where Go-REDD+ can be improved to serve the recipients’ interest.

### Survey Results

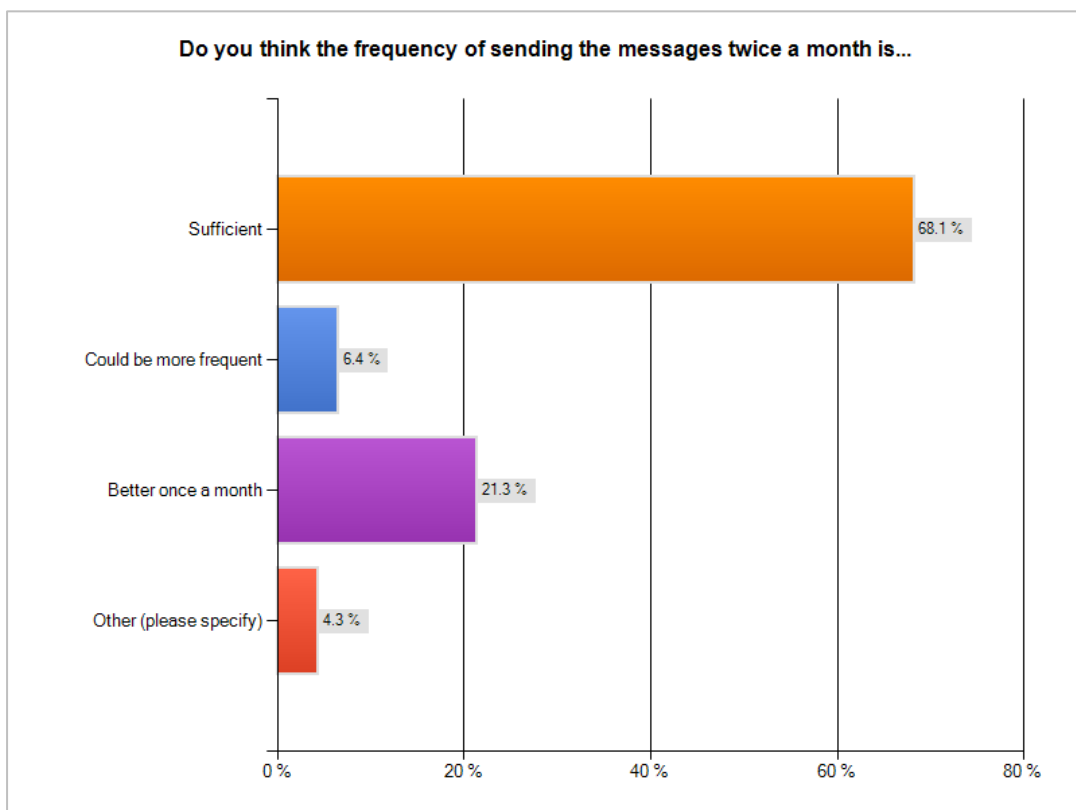

- **The majority of Go-REDD+ recipients are those who work as development partner staff, closely followed by NGO and CSO members.** Others are policy makers, consultants, academia, scientists, researchers, UN-REDD staff and forest manager.

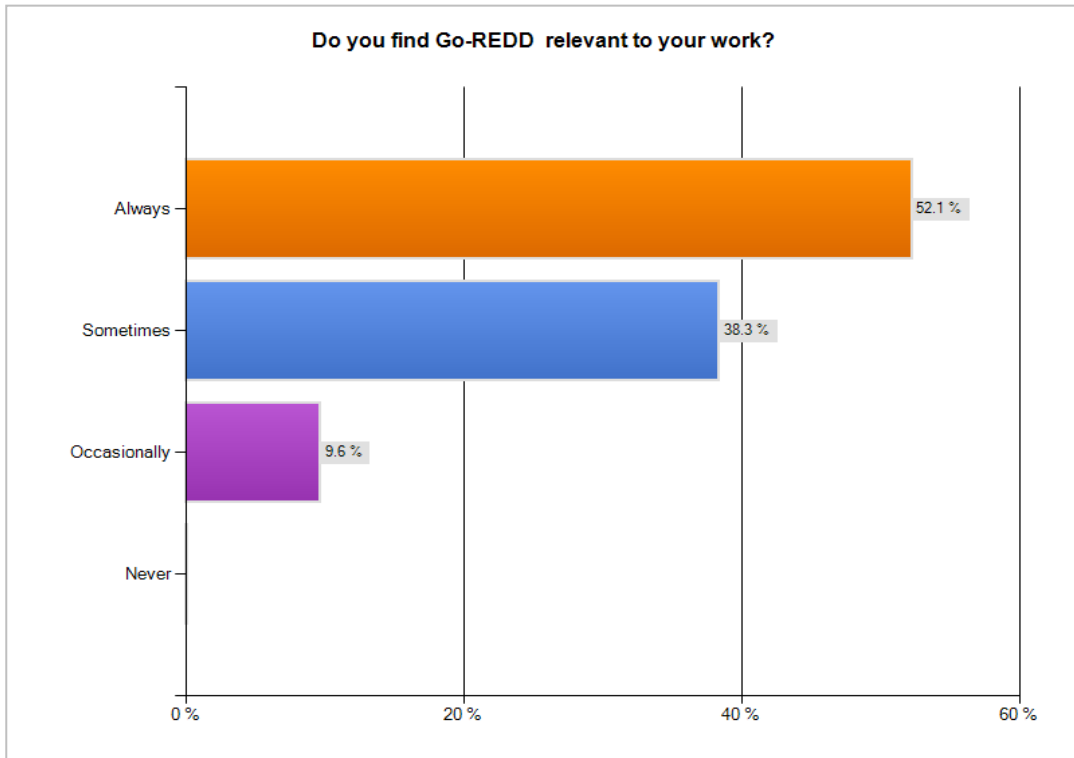

- **Go-REDD+ messages reached the recipients twice a month as planned with only small numbers of readers who didn't receive messages regularly.** However, this could partially due to level of email's security setting which each user has.

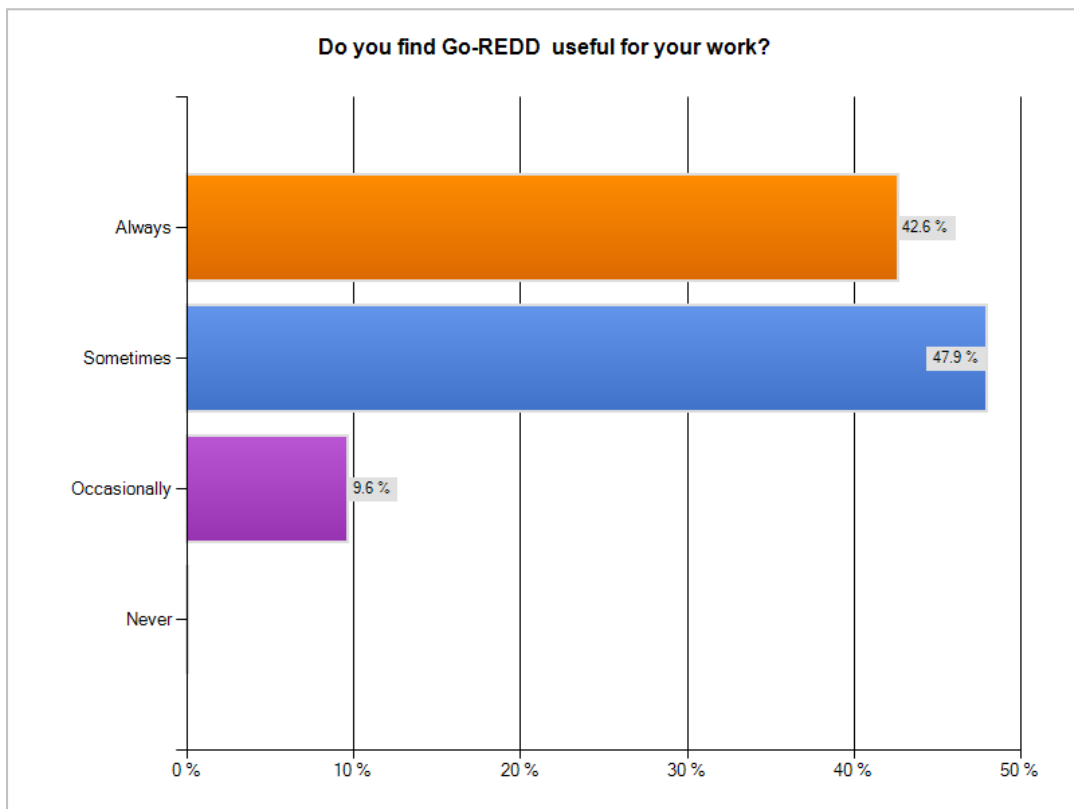

- **More than half of the recipients were satisfied with number of messages the team have sent each month.** Others commented that number of articles sent each month were adequate at this stage. Depending on the content, if there has been not much update on REDD+ issues, Go-REDD+ article can be circulated less frequency. Some suggested that the article should be incorporated into the UN-REDD Newsletter.

- The recipients generally found Go-REDD+ messages were related to their work, with only small number said they were occasionally related.** In order to make Go-REDD+ become more relevant to the readers' works, their suggestions included having a regular meeting among Go-REDD+ recipients, sharing articles on updates of REDD+ readiness activities and issues of the latest COP conference, providing experiences of REDD+ implementation including challenges and best practices of national readiness processes in REDD+ piloting or others countries, etc. Please see Annex II for other comments.

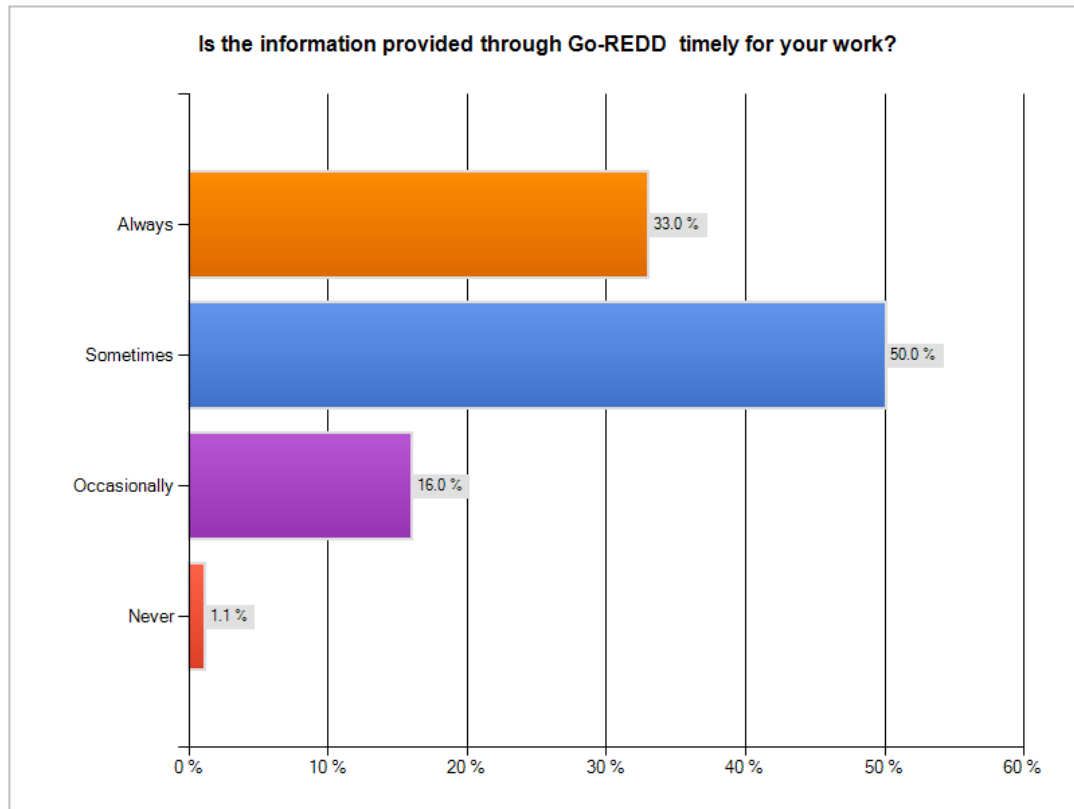

- The readers found Go-REDD+ was sometime useful for their work, while many thought the article was always useful for them.** Although some said that Go-REDD+ already covered and

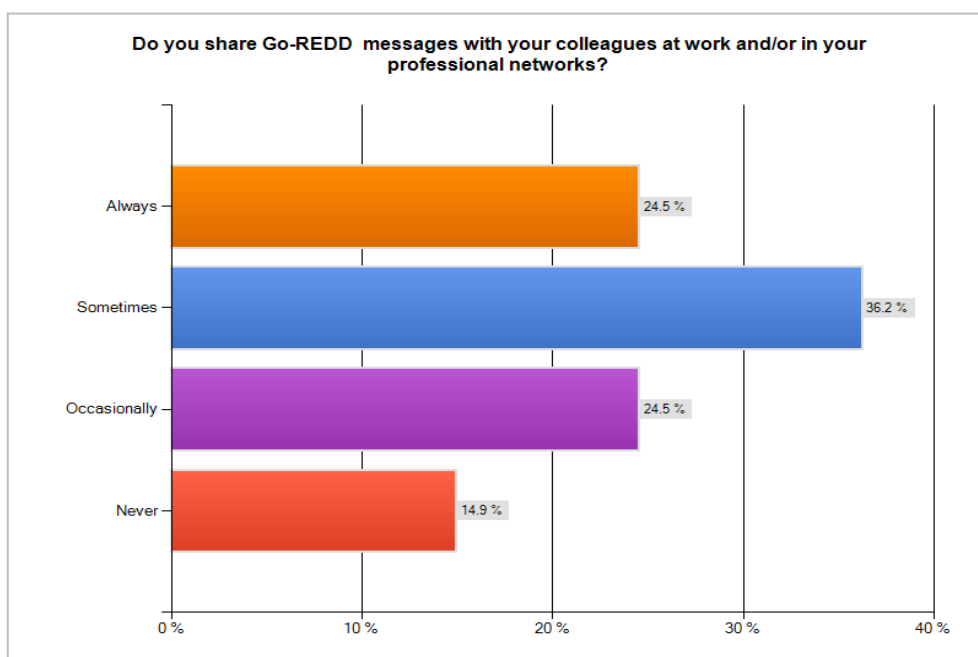

updated issues from all the REDD+ perspectives, many suggested how Go-REDD+ could become more useful including having topics of Go-REDD+ as specific as possible, and examples of some REDD+ activities done in UN-REDD countries, which can be adapted to other countries' context and included in country's AWP. Please see Annex II for other comments.

- **Many times, Go-REDD+ provided timely information related to REDD+ and REDD+ readiness to recipients with only very small number said never.**

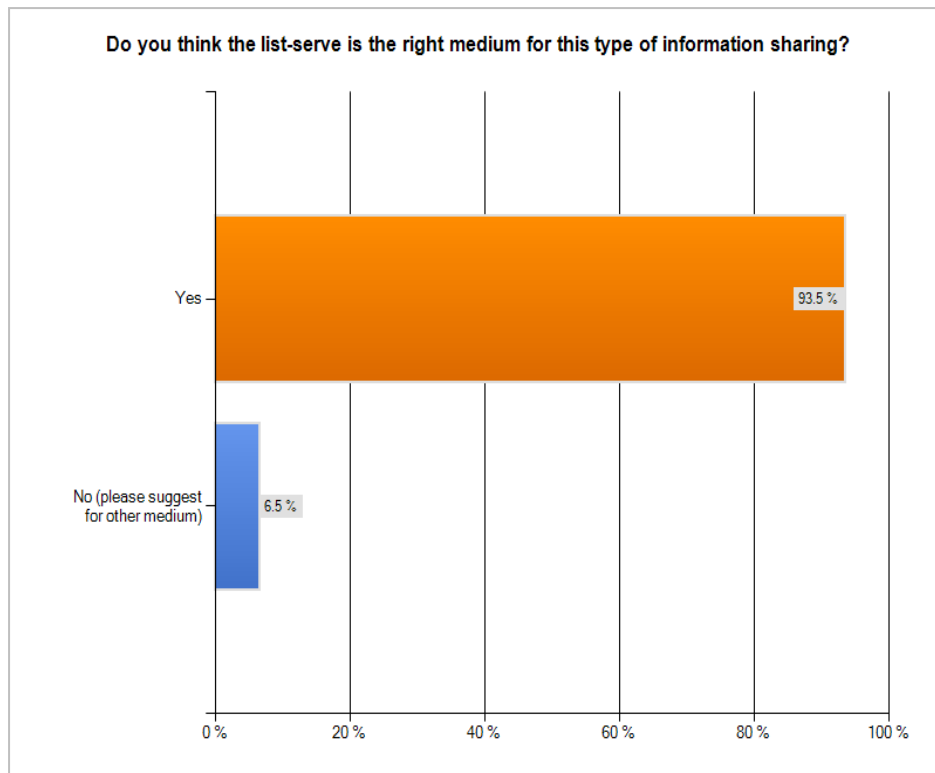

- **Go-REDD+ messages are shared among colleagues and professional network, and only some say never.**

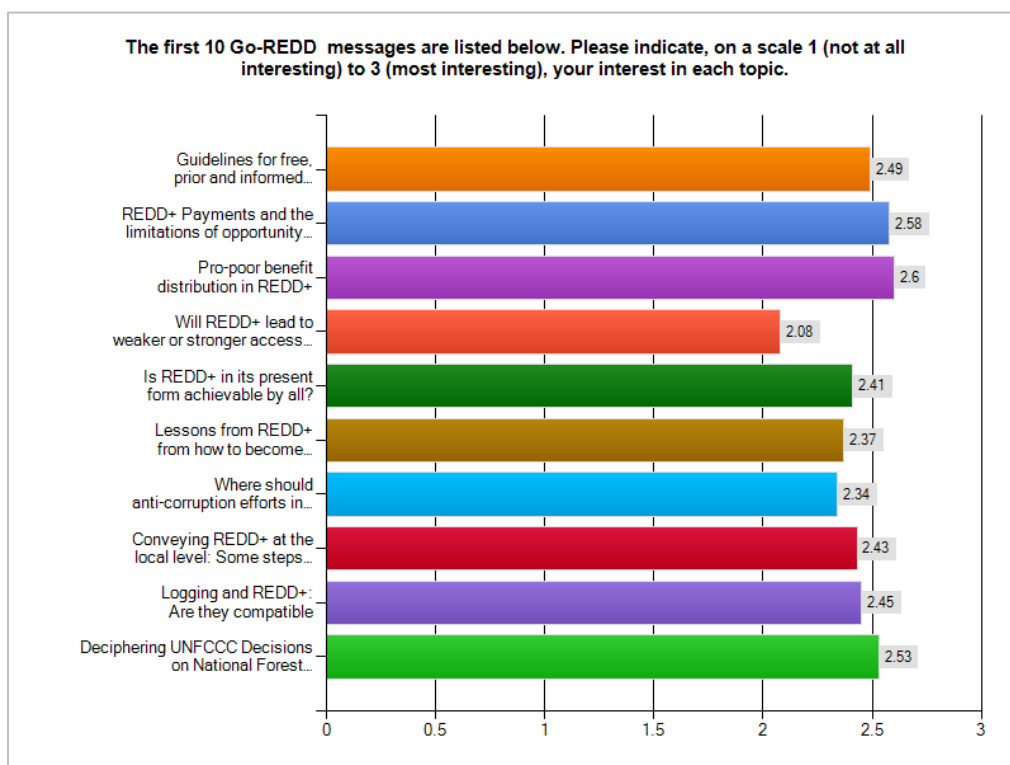

- Overall, almost all recipients agreed that listserv was the right medium to share Go-REDD+. However, some suggested a better ways including online newsletter and social media like twitter.

- On a scale of 1 (not at all interest) to 3 most interesting, all articles were scored above average. Interestingly, the recipients seemed to be more interested in articles related to Benefit Distribution Systems, especially when the articles written from experience or examples happened in REDD+ piloting countries.

- **REDD+ topics, which the readers would like the team to cover can be grouped into Safeguards, MRV and Monitoring, Benefit Distribution Systems, Policies and Measures and Others as listed below.** Many suggested topics including experiences and lessons learned of REDD+ and REDD+ readiness in piloting countries as well as the most recent updates on UNFCCC discussions.

Note: Number in (...) indicates number of suggested topics, which were given by the recipients.

<i>Safeguards</i>			
<i>Community and Indigenous peoples</i>	<i>Communication strategies</i>	<i>Environmental protection and conservation</i>	<i>General Safeguards</i>

--	---	--	---

- **Other comments**

Overall, the recipients gave positive responds to Go-REDD+ initiative for its brief update on REDD+ issues and easy access. They satisfied with quality and topics that Go-REDD+ messages covered so far. However, some useful and interesting comments were shared including collaboration with Go-REDD+ in communication of REDD+/REDD+ readiness issues, as well as other key issues that should be shared in Go-REDD+ articles. The comments are summarized as below.

Summary of comments
<ul style="list-style-type: none"> <li>• Go-REDD+ provides a brief analyzed article, which helps readers to determine if the source of article is worth reading</li> </ul>
<ul style="list-style-type: none"> <li>• Go-REDD+ is definitely easier and more accessible to a reader, but would be even better if it's shorter.</li> </ul>
<ul style="list-style-type: none"> <li>• Go-REDD+ should includes knowledge building on new REDD+ methodologies particularly on JNR</li> </ul>
<ul style="list-style-type: none"> <li>• Sustainable forestry is better than REDD+</li> </ul>
<ul style="list-style-type: none"> <li>• Very urgent need to develop fair and just policies on REDD+ that would ensure the full and effective participation including FPIC from rights holders - indigenous peoples in each country</li> </ul>
<ul style="list-style-type: none"> <li>• Initiative which was built in REDD+ strategy in Indonesia has the potential to obscure the breach that has occurred and is associated with protecting the corrupt practices of the past</li> </ul>
<ul style="list-style-type: none"> <li>• Collaboration in communication with Bern University of Applied Sciences, which works closely with the ASEAN Social Forestry Network and its three implementation partners RECOFTC, NTFP-EP and CIFOR</li> </ul>
<ul style="list-style-type: none"> <li>• UN-REDD should focus on implementation and leave the sharing of academic knowledge to others who are better placed (and who are doing it already)</li> </ul>
<ul style="list-style-type: none"> <li>• Go-REDD+ articles are used in Facebook group (OCCD) and the relevant information keeps key stakeholders in the country (PNG) well-informed</li> </ul>

## Conclusions

Based on the results of this survey, we can conclude that main recipients of GO-REDD+ are development partner staff as well as those working in NGOs and CSOs, and they find Go-REDD+ is generally useful and interesting to the work. The concise messages and up-to-date topics of article reach the readers on a regular basis, and are often shared with their professional colleagues, although not widely. All in all, they are satisfied with the information that the listserv provides.

However, some suggested that listserv might be an appropriate medium to circulate this article at this stage, some other tools including social media like twitter or e-newsletter can possibly be better tools to circulate Go-REDD+ in a longer run. The number of messages released each month are sufficient, while a potential in sending more or less messages in the future depending on updates of REDD+ issues, which will happen in future discussions.

Interestingly, the readers find Go-REDD+ is more useful and interesting when articles are written based on experience or lessons leaned of REDD+ piloting countries, so they can adjust or adapt experience and good practices into REDD+ implementation in the context of their countries.

## Annex I

## Go-REDD+ Questionnaire

**1. How would you describe yourself?**

- Policy maker (national level)
- Forest manager (national/sub-national)
- Member of NGO or CSO
- Development partner staff
- Consultant
- Other

**2. We aim to send Go-REDD+ messages twice/month. Do you receive them regularly?**

- Yes
- No

**3. Do you think the frequency of sending the messages twice a month is...**

- Sufficient
- Could be more frequent
- Better once a month
- Others, please specify \_\_\_\_\_

**4. Do you find Go-REDD+ relevant to your work?**

- Always
- Sometimes
- Occasionally
- Never

**4a. How could Go-REDD+ become more relevant?**

---

**5. Do you find Go-REDD+ useful for your work?**

- Always
- Sometimes
- Occasionally
- Never

**5a. How could it be made more useful?**

---

**6. Is the information provided through Go-REDD+ timely for your work?**

- Always
- Sometimes
- Occasionally
- Never

**7. Do you share Go-REDD+ messages with your colleagues at work and/or in your professional networks?**

- Always  
 Sometimes  
 Occasionally  
 Never

**8. Do you think the list-server is the right medium for this type of information sharing?**

- Yes  
 No

If no, please give us your suggestion: \_\_\_\_\_

**9. The first 10 Go-REDD messages are listed below. Please indicate, on a scale from 1 (not at all interesting) to 3 (most interesting), your interest in each topic.**

	Not at all interesting	Average	Most interesting
Guidelines for free, prior and informed consents for REDD+	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
REDD+ Payments and the limitations of opportunity cost approaches	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Pro-poor benefit distribution in REDD+	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Will REDD+ lead to weaker or stronger access rights in Cambodia?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Is REDD+ in its present form achievable by all?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Lessons from REDD+ from how to become forest-adding country	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Where should anti-corruption efforts in the forest sector?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Conveying REDD+ at the local level: Some steps in the right direction	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Logging and REDD+: Are they compatible	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Deciphering UNFCCC Decisions on National Forest Monitoring Systems for REDD+	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

**10. Please suggest topics you would like us to cover?**

\_\_\_\_\_

**11. Other comments:**

\_\_\_\_\_

\_\_\_\_\_

## Annex II

**How could Go-REDD+ become more relevant?**

- Have a regular meeting among Go-REDD+ recipients
- Update on REDD+ readiness activities
- Provide more information on the discussed issues of the latest COP conference, and perspective for the future. Circulate up-to-date reports on what is being discussed at SBSTA/COP and other related UN-REDD activities that have been undertaken with lessons learned.
- Keep abreast with the concept given its significance to sustainable land management (SLM) and its implication to SLM policy, leasing terms and conditions and better understanding.
- Provide experiences of REDD+ implementation including implementation challenges of national readiness processes in REDD+ piloting or others countries, and disseminate best practice as well as challenges of building capacity, institutional arrangements and multi-stakeholder platforms. The article should also focus more on analyzing the results of UN-REDD's work.
- Look into where each country is at REDD+/REDD+ readiness processes, for instance, where is Papua New Guinea in terms of REDD+ Policy formulation etc.
- Tackling the Law Enforcement dimension

**How could it be made more useful?**

- Go-REDD+ already covers and updates issue from all the REDD+ perspectives.
- Make Go-REDD+ as specific as possible. There are many general REDD+ news, but specific news or short clear explanations of technical issues are always useful.
- Example of some REDD+ activities done in UN-REDD countries, which can be adapted to other countries' situation and included in country's AWP.
- There are many articles and many distribution lists providing access to the latest articles and papers. In fact the same publications go round and round the lists. It would be more useful to focus on the experiences and lessons from UN-REDD's work.
- More detailed information or demonstration works; especially in developing countries.
- Examples from the field will help to replicate good initiatives.
