
Knowledge Management

UNREDD+ AFRICA

Structure

1. State of Knowledge Management/Communication Africa
2. Findings KM Survey
3. Regional 2014 KM/Communication Proposal- key activities
4. Suggested Activities on KM/Comms for REDD+ Africa 2015

Knowledge Management/Comms Africa

- Regional/Sub-regional Knowledge Exchanges- yet knowledge still fragmented
- KP- Lessons learned Africa 2012/State of Readiness 2014 and UNEP case studies
- No community of practice in Africa
- Lack of systematic approach to capturing of lessons learned

1. In Africa there are a total of 26 partner countries
2. KM Knowledge Needs Survey administered during NS workshop held in Nairobi 14th-15th October 2014
3. 24 national REDD+ focal points, coordinators or their representatives and advisers from 21 different REDD+ countries in Africa
4. 21 responses received on the survey- all respondents are national/sub-national government representatives

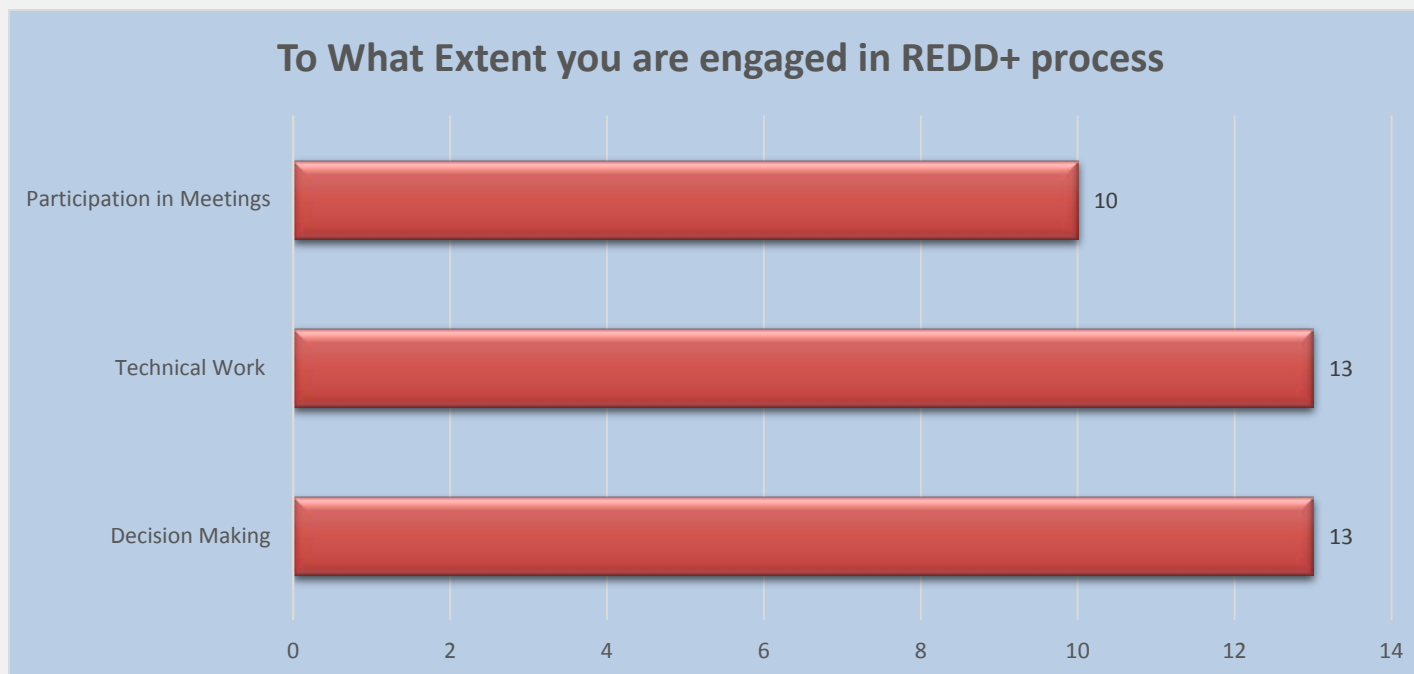

Gender (im) balance

Experience with REDD+

Level of engagement in REDD+

Priorities for KM-REDD+ Africa

What should be the top 3 priorities on KM for REDD+ Africa

Knowledge access

Sharing and Networking on REDD+

Expectations of K access

Attributes you expected from knowledge you access

Strategic Objectives to have additional K on

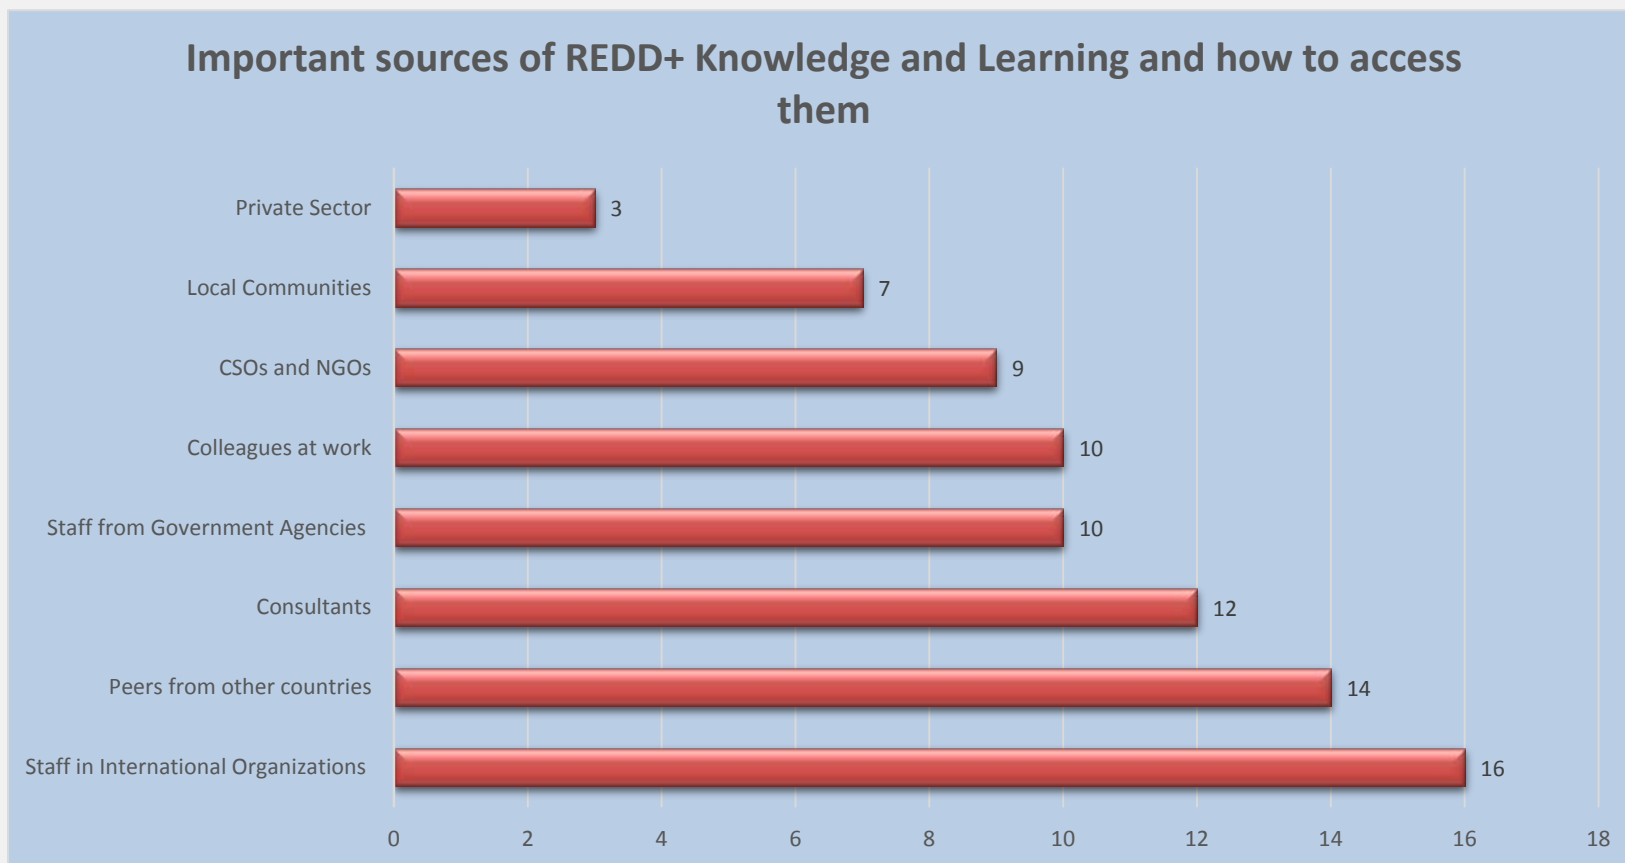

Rate of Interest in the Following KPs

Preferred formats of K sharing to use

Sources of REDD+ Knowledge and Learning

Existing Expertise

Solid Knowledge to share with others

Most useful channels of knowledge

Channels of knowledge you find most useful

Conclusions

- Level of sharing amongst stakeholders is irregular and occasional
- The priorities for knowledge sharing: South-south exchanges and bridging the knowledge gap (scaling-up lessons learned)
- Attributes expected from knowledge access-practical, *simplistic, elaborate*, easy to access
- Subjects to have additional knowledge on: elaborating national strategies, national forest monitoring systems
- The type of knowledge products needed: policy briefs and lessons learned
- Most useful formats of knowledge sharing- workspace and COPs
- Channels of knowledge- Seminars/conferences and field visits/study tours
- Sources of Knowledge and Learning: Staff of International Organizations, Peers from other countries, Consultants

Regional KM Proposal

1. South-South Exchanges- sub-regional exchange Southern Africa sub-region on national REDD+ strategy development- **\$124,000**
2. Publication, Presentation and Dissemination of REDD+ Analytical Products- **\$30,000**
 - a) Methodological framework for REDD+ readiness
 - b) State of REDD+ in Africa (early movers)
 - c) Local REDD+ Investing Locally for REDD+ Implementation
 - d) KM Needs Assessment Report
 - e) Policy brief National Strategies Development Africa-
3. Production of a high quality an “African REDD+ story documentary” -**\$130,000**
4. Strengthen knowledge exchange on forest biomass and carbon stock assessment-FAO- follow- up regional workshop Ghana- booklet and web content- **FAO- \$26,000**

TOTAL- \$300,000

Suggested KM Focal Areas

Knowledge Needs Assessment-baseline- a) KS survey; b) individual interviews; c) phone/skype interviews; d) **Pilot 2 in-depth country needs KM assessment**

- I. Development of Knowledge Products- Generate and Create Knowledge-
- II. Strengthen Regional Network on REDD+- Share and Aggregate Knowledge
- III. Coordinate targeted capacity development- develop KM capacities
- IV. Promoting a sustained knowledge sharing and learning culture – incentives for knowledge sharing

Development of Knowledge Products- Generate and Manage Knowledge

- I. Systematically capture, share and apply lessons learned from experiences- lessons from the in-country readiness process are systematically captured: **South-South Exchanges-**
 - a) **Pilot knowledge exchange between 2 countries** -1 week mission-targeted lessons learned exercise-Zambia-Ghana/Kenya and cross-regional fertilization of experiences-Zambia/Costa Rica
 - b) **Cluster of countries** (Ghana/Nigeria/Ethiopia; DRC, Rec Congo, Zambia, Kenya; Nigeria, Ethiopia, Cote D'Ivoire, Madagascar)
- II. Identify a series of priorities knowledge products for development, linked to REDD+ thematic areas, based on country preferences and identified gaps;
 - A) **Policy Brief-NS;**
 - B) **Lessons Learned;**
 - C) **Brochure on UNREDD Africa;**
 - D) **Discussion Paper –Nigeria-How to do REDD+ in a Federated state**
- III. Identify country communication needs

Strengthen Regional Networks- Share and Aggregate Knowledge

- I. Communities of practice established connecting partners-in order to engage in discussions, pose questions and receive advice, or work collaboratively on projects -**REDD+ Africa COP** to be established and hosted on new workspace
- II. Hold lessons learned events to support knowledge exchanges amongst countries and organizations, and to capture knowledge and lessons learned about high priority REDD+ topics- Face to face/virtually and process document dialogues –

a) **Lessons learned events in 2015 to capture lessons learned/knowledge fairs -1 Regional and 2/3 sub-regional**

- III. **Systematization of lessons learned-After Action Review-** what happened and why? What worked well? What needs improvement?
- IV. **Peer assist;** Aggregate and synthesize issues of interest into an information base/repository of tools/standards –**Roaster of Experts;- Workspace**
- V. Amplifying conversations and stories- **Interviewing and recording stories** in audio and video format (2 min videos)

Coordinate Targeted Capacity Development

- I. Deliver a **REDD+ Academy** and tools for REDD+ capacity development- how can KM practices be an integral part of the academy
- II. Integrate **knowledge management practices into targeted Support** to respond to country needs – Support to Zambia for developing Targeted Support Proposal 2015- integrate KM practices in the proposal
- III. Develop **national knowledge management** and capacity development plans – pilot – a) pilot 2 countries- targeted assessment of KM needs- develop a KM national plan
- IV. Develop **repository** capacity development resources- a) support countries to set-up their national pages on the workspace; b) training on the newly launched workspace

Promoting a Sustained Knowledge Culture

- Introduce incentives for collaborative action. Encourage effective time/energy management to ensure that staff dedicate, and are allowed to dedicate, sufficient time to KM.
- **Training on online resources-new workspace for staff of UNREDD programme;** Regular short **meetings/Brown bag lunches** upon return from mission to share key findings-platform for increased knowledge sharing and learning
- **Monthly 20+20 Knowledge Sharing-** Identify relevant topics to discuss as a team and learn from one another

Support needed from global level

- I. Develop a global **coherent approach to publications**. A simple typology of knowledge papers outlining the various publication lines and their processing and dissemination; Maintain track of upcoming publications global/regional

- II. **Quality Assurance Process**-standard level of quality UN-REDD+ products globally; Knowledge Products **templates online**;
 - I. The networks will provide a foundation for learning, for the measurement and evaluation of the knowledge value and they will serve as **laboratories for systematic learning-thus** UN-REDD+ newsletter to be linked with stories coming from these regional/country level discussions-(feature stories of one National Coordinator/national programme per month)
