

Worksheet: Populating a Safeguard Information System

1. An SIS provides information on how all safeguards are addressed and respected. There are different ways to do this - which of the following kinds of information do you think it is important to include for all safeguards, and why?
2. Remembering the previous day's discussions **on benefits and risks of potential REDD+ actions**, what are the existing information systems and sources and any gaps for the following:
 - a. Documentation and description of Policies, Laws or Regulations that have been identified as addressing the safeguard?
 - b. Information showing to what extent these PLRs are being implemented in practice?
 - c. Information on whether the benefits and risks related to the safeguard are materialising?
 - d. Other?
