

1. What could be the objectives of the SIS in your country?

A large, empty rectangular box with a thin black border, intended for the user to write their response to the question above.

2. What options are you considering for the structure of your Safeguard Information Systems? What might be the advantages and disadvantages of these approaches?

A large, empty rectangular box with a thin black border, intended for participants to write their responses to the question above. The box is currently blank.

3. Stakeholder engagement

Where and how would stakeholder participation be most effective in the SIS design and operation?

Potential steps in the SIS design process include:

- Define SIS objectives
- Determine information needs and structure (e.g. indicators)
- Assess existing information systems and sources
- Identify desired outputs of an SIS
- Design information management
