

# Review of Outcomes and Outputs Potential areas for cooperation

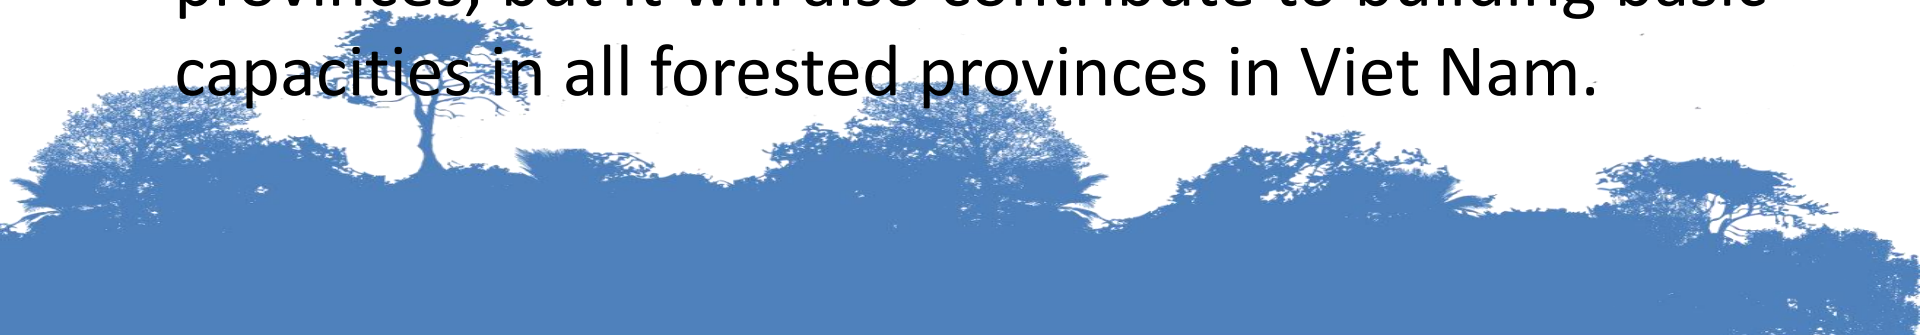

**Inception Workshop of the  
Viet Nam UN-REDD Phase II Programme**

**11 October 2013  
Ha Noi**

## **Outcome 1: Capacities for an operational National REDD+ Action Programme (NRAP) are in place**

- To ensure that the NRAP will be fully operational, strong capacities are required at all levels and with diverse stakeholders. These capacities cover a range of technical, legal, analytical and participatory issues. Outcome 1 will focus in particular on building capacities at the national level and in the six pilot provinces, but it will also contribute to building basic capacities in all forested provinces in Viet Nam.

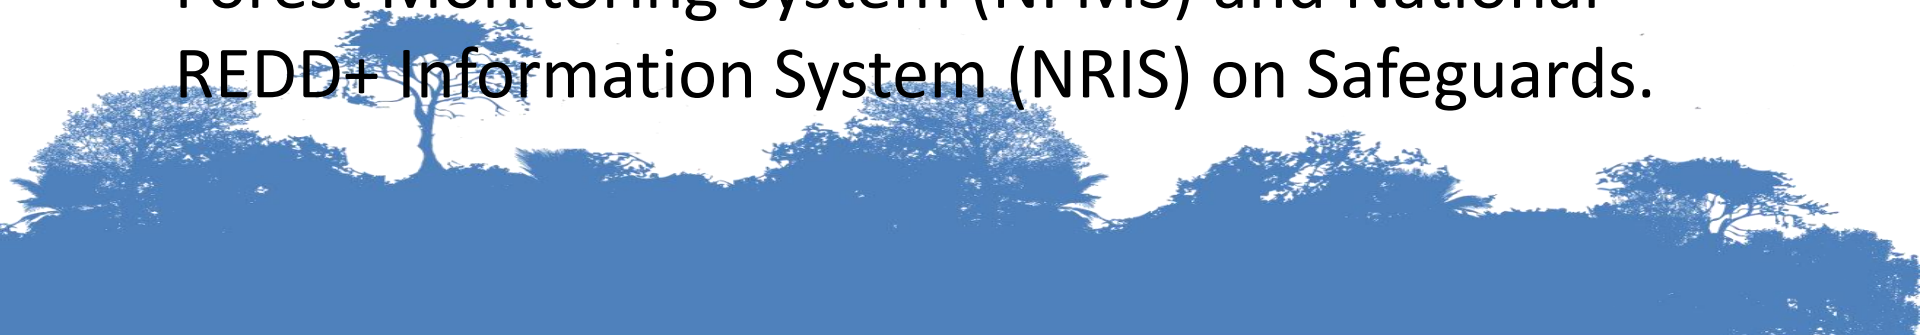

## **Outcome 2: The six pilot provinces enabled to plan and implement REDD+ actions**

- This Outcome will focus on six of the pilot provinces where results-based REDD+ activities are to be demonstrated. This includes amongst others planning at the provincial and local levels (here ultimately for site-based activities), mainstreaming of REDD+ into FPDP, and setting up of necessary institutions.

## **Outcome 3: National Forest Monitoring System (NFMS) for Monitoring and Measurement, Reporting and Verification and National REDD+ Information System (NRIS) on Safeguards are operational**

- This Outcome responds to the UNFCCC, COP 16 and COP 17 decisions. The Programme together with Outputs 2.6 and 2.7 under Outcome 2 will help establish and operate Viet Nam's REDD+ National Forest Monitoring System (NFMS) and National REDD+ Information System (NRIS) on Safeguards.

## **Outcome 4: Stakeholders at different levels are able to receive positive incentives**

- Under this Outcome, a national-level functional system for providing incentives will be established. The system will both provide positive incentives to stakeholders in the pilot provinces, and ensure that REDD+ funds are used in line with international governance standards. It will be based on lessons to be learnt in the six pilot provinces.

## **Outcome 5: Mechanisms to address the social and environmental safeguards under the Cancun Agreement established**

- Implementation of the NRAP, and all actions under the Phase II Programme, are to be fully consistent with the UNFCCC's Cancún Decision on long-term cooperative action, in particular related to addressing and respecting safeguards. The Outcome will determine the national mechanisms required to ensure the safeguard.

## **Outcome 6: Regional cooperation progress on REDD+ implementation in the Lower Mekong Sub-region**

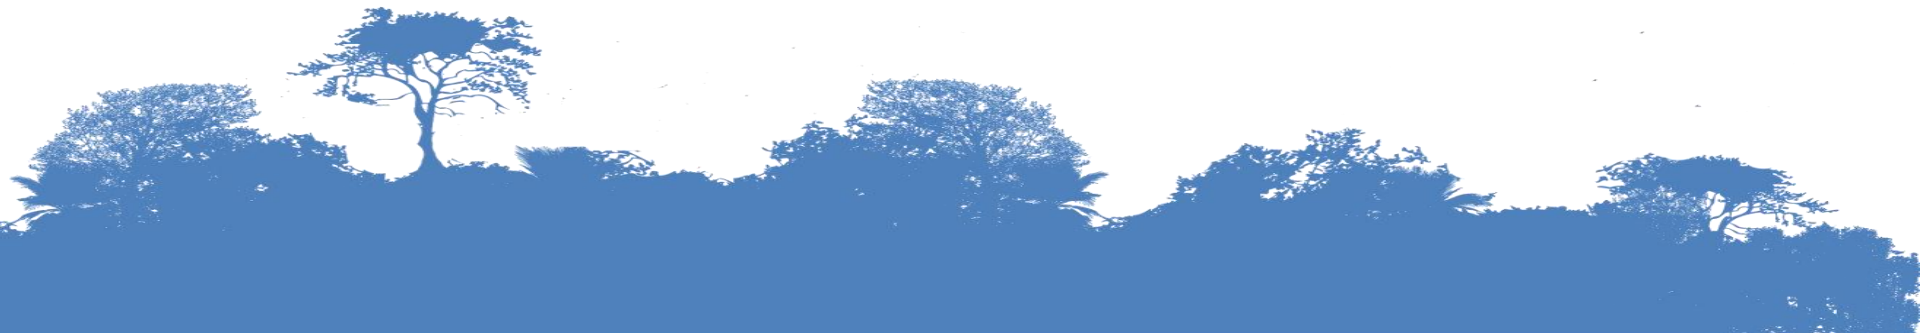

- Under this Outcome, regional cooperation will be strengthened on law enforcement and FLEGT, on sustainably managing the timber and timber processing industries, and on forest biodiversity conservation. Efforts to reduce cross-border displacement will be taken.

# Review

- Three Breakout groups
  - Group 1: Outcomes 2,4, and 5
  - Group 2: Outcome 3
  - Group 3: Outcomes 1 and 6

# Cooperation

- The four implementing partners in the UN-REDD Phase II Programme would like to cooperate with a variety of partners during the implementation of the Programme at national, provincial and local level.
- We therefore would like to ask you to discuss in your group the potential areas of cooperation with your or other initiatives as a first step.

**Thank you for your attention!**
